- Other Languages: SQL, HTML, FXML, CSS, SCSS
- Frameworks: JavaFX, Bootstrap, ReactJS, ASP.NET Web Forms, Swing, JUnit
- Version Control Systems: Git
- Database Management: SQL Server, MySQL, SQLite, Microsoft Access

## PROJECTS

<b>Fast Twitch Games</b>	JavaScript, ReactJS	9/18-11/18
A chrome extension using Twitch API that quickly links to people streaming your favorite video games. The extension stores your games in local storage so you don't have to re-add your games each time you open the app. It displays the twitch user, stream title, view count, and stream thumbnail for each stream of a specified game.		
<b>West Virginia RV</b>	Java, JavaFX, FXML	8/18-9/18
The main purpose of this app is to keep track of rental property. A client's property position, contact information, bills, and payment status (based on weekly or monthly periods); as well as the general upkeep and utility bills for the property as a whole are recorded.		
<b>CRUD Music</b>	C#, ASP.NET Web Forms	6/18-7/18
A CRUD app with user registration and login/logout where a user can create, select, update, and delete artist and album records. The app also displays a random artist and album to listen to each day based on the user's records.
